Pelagic 50 BOP Fluid Concentrate is an environmentally acceptable, technically superior alternative to standard BOP Fluids on the market today.

Pelagic 50 BOP Fluid is designed for use at 2-3% v/v in fresh or potable water and can be used with standard MEG antifreeze or Pelagic Stack Glycol.

Pelagic 50 BOP Fluid boasts 5 years field experience on a wide variety of Offshore Drilling Rigs with 10-15 units currently using the product in the North Sea alone.

Pelagic 50 BOP Fluid is technically superior to standard BOP Fluids on the market and exhibits outstanding lubricity, anti-wear, material compatibility, corrosion protection, stability and microbiological protection.

Pelagic 50 BOP Fluid is Yellow Zone for discharge in Norway and is categorized as OCNS Class E with no substitutable components for UK discharge.

Pelagic 50 BOP Fluid does not form 'insoluble slime' deposits in BOP Control Systems.
